

I think it would be a ridiculous move to stop Satellite Radio from broadcasting local information like Traffic and Weather. I am a recent purchaser of satellite radio and I will probably never go back to regular radio channels. I do not enjoy the commentary and ridiculous advertising. I pay for the satellite service and I should be able to have my local information included.

I cannot believe that we as Americans continue to tolerate this type of petition and ruling. It's already been proven as unacceptable with regular satellite television. I thought we had de-regulated, only to find that we are re-regulating certain audiences.

Please accept my sincere rejection of this petition.
